Street Lighting Division

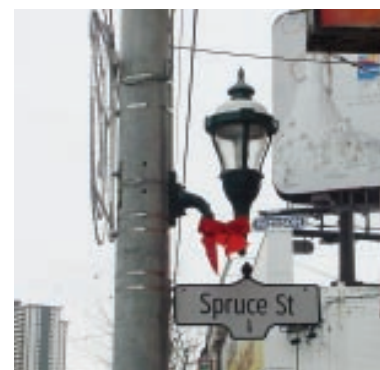

Lighting the way where we work and live.

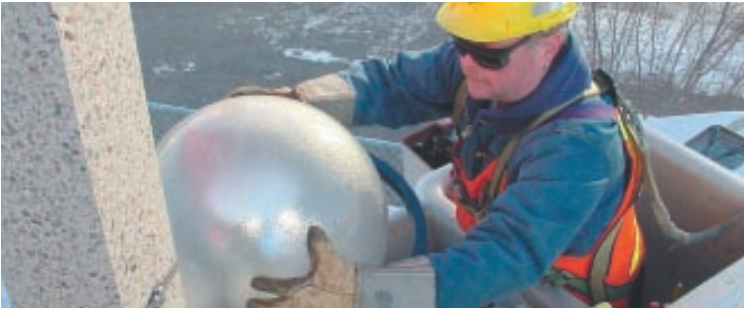

Decorative street lights are a simple, cost effective way to brighten your community and make our city streets safer.

- Capitalize on a swift makeover
- One-stop, turnkey operation
- Benchmarked unit pricing provides a low-cost solution

Capital Cost Share Program

Right now, the City of Toronto Economic Development Department is funding **50% of the development costs** for lighting projects in Business Improvement Areas. There's no better time to implement decorative lighting in your neighborhood.

Brighten Your Block

A business area is easily identified by its look and feel—think of Little Italy, Greek Town, or the Theatre District: each has a distinct character built around aesthetics that include decorative lighting. Decorative street lights brighten communities throughout the city. They can illuminate a dark corner, light your route home, or throw festive cheer onto a bustling urban community.

One-Stop Shop

Our decorative street lighting service offers a one-stop, turn-key solution to improve the appearance of your area. From the initial planning stages through to design, implementation and maintenance, we're with you until the lights go up. Once you are enrolled as a client in our maintenance program, your area will be patrolled regularly, ensuring quick replacement of bulbs whenever necessary.

Remember, 50% of your development costs will be covered by the City of Toronto through the Capital Cost Share Program for Business Improvement Areas. Light up your community now. You'll like what you see.

Toronto Hydro Energy Services Inc. is a professional energy services company focused on helping multi-residential, commercial, industrial, institutional, and government customers reduce their energy consumption and realize sustainable energy savings. In addition, Toronto Hydro Energy Services owns and operates the street and expressway lighting assets within the City of Toronto and is involved in the development and operation of renewable, clean-energy generation projects. Toronto Hydro Energy Services is firmly committed to energy conservation and clean energy initiatives.
